

PC205 / PX255

The Ultimate Partner for Modular Ice Production

The Gold Standard of Ice Preservation: Designed to perfectly complement our high-capacity PC (Cube), PN (Nugget), and PF (Flake) modular ice makers, the PX Series ensures that the premium ice you produce remains in perfect condition until the moment it is served. These silos are engineered for extreme versatility and resilience, making them the definitive choice for environments far beyond the traditional commercial kitchen.

From the high-intensity, rapid-volume service of stadiums, nightclubs, and busy bars to the stringent, safety-critical hygiene requirements of hospitals and healthcare facilities, the PX Series provides an uncompromising storage solution. Each unit features ultra-high-density injected insulation to drastically reduce melting rates, housed in a robust AISI 441 stainless steel exterior. This premium construction ensures that regardless of the setting, your ice supply is protected, sanitised, and ready for high-capacity demand.

Standard Features

- > **Microban® Antimicrobial Protection:** The internal liner is embedded with silver salts to actively reduce bacterial proliferation and simplify the cleaning process.
- > **Hygienic Interior:** Seamless, one-piece moulded polyethylene liner with rounded corners for easy cleaning.
- > **Premium Insulation:** High-density injected polyurethane foam provides maximum ice preservation and thermal efficiency.
- > **Ergonomic Access:** A sloped front design combined with highly durable door hinges ensures easy and rapid scooping for staff.
- > **Stable Foundation:** Fitted with heavy-duty, adjustable stainless steel legs for easy levelling.
- > **Drainage:** Includes appropriate drainage fitting for meltwater runoff.
- > **Compatibility Focus:** Designed to accept various modular heads (adapter plates may be required for certain combinations).

Sizing Your Storage: Choosing the right bin is crucial for managing workflow. A common industry guideline is to select a storage capacity equal to roughly 50% to 70% of your machine's 24-hour production. The PX range offers sizes from compact under-counter solutions to massive reservoirs, ensuring you always have the necessary buffer stock ready for immediate access during peak periods.

Model	Storage PC	Storage PF / PN	Direct Compatibility	Gross Weight	Width	Depth	Height ³
